

SURVEY FOR PARENTS

The following survey has a number of objectives. Primarily, it represents your opportunity to communicate your insights, expectations and unique understanding of your child to the ASA counseling staff. This survey will become an important element in your child's counseling file, where it will complement statistical data (transcripts, test scores, school profiles, etc.) with more personal information specific to your child and your family. Responding thoughtfully to these questions should also help to increase your awareness of complex issues that you will face during the admissions process.

We suggest that you work through this survey without input from your son or daughter. After you have completed the survey, you can meet as a family to talk about your answers. Feel free to add additional comments on separate sheets of paper or add responses to multiple-choice questions. All of the information you provide will prove invaluable to your child's ASA college counselor.
